

Entrega Portal do Aluno — Tech Challenge Fase 3

Campo	Valor
Data	2026-09-06
Índice canônico	../architecture/delivery-index.md

1. Links dos 4 repositórios

1. <https://github.com/dinhogt/autoservicemanager-app>
2. <https://github.com/dinhogt/autoservicemanager-auth-lambda>
3. <https://github.com/dinhogt/autoservicemanager-infra-db>
4. <https://github.com/dinhogt/autoservicemanager-infra-k8s>

Monorepo legado (não entregar como principal): <https://github.com/dinhogt/autoServiceManager>

2. Documentação

Item	Link
Índice	https://github.com/dinhogt/autoservicemanager-app/blob/develop/docs/architecture/delivery-index.md
Solution design	https://github.com/dinhogt/autoservicemanager-app/blob/develop/docs/architecture/solution-design-fase3.md
Diagramas	https://github.com/dinhogt/autoservicemanager-app/blob/develop/docs/architecture/diagrams-fase3.md
ER	https://github.com/dinhogt/autoservicemanager-app/blob/develop/docs/architecture/er-diagram.md
ADR-011	https://github.com/dinhogt/autoservicemanager-app/blob/develop/docs/architecture/adr-011-sync-rest-api-gateway.md
Bootstrap AWS (sem apply)	https://github.com/dinhogt/autoservicemanager-app/blob/develop/docs/infrastructure/aws-bootstrap-no-apply.md
QA	https://github.com/dinhogt/autoservicemanager-app/blob/develop/docs/qa/validation-report.md

3. Vídeo (≤15 min)

Roteiro: [video-script.md](https://github.com/dinhogt/autoservicemanager-app/blob/develop/docs/qa/validation-report.md)

URL YouTube/Vimeo: ***preencher após gravação (requer apply + smoke para demo live)***

4. Colaborador `soat-architecture`

Repo	Convite Read
app	Enviado — pending accept (id 331871608)
auth-lambda	Enviado — pending
infra-db	Enviado — pending
infra-k8s	Enviado — pending

Confirmação no PDF: “Convites Read enviados aos 4 repositórios; aceite do usuário `soat-architecture` pendente na data da geração deste documento.”

5. Como gerar o PDF

1. Abrir este arquivo + [delivery-index.md](https://github.com/dinhogt/autoservicemanager-app/blob/develop/docs/architecture/delivery-index.md) no GitHub (Print → Save as PDF), **ou**
2. `npx --yes md-to-pdf docs/delivery/portal-entrega.md` (na raiz do app).

Arquivo gerado localmente (se existir): `docs/delivery/portal-entrega.pdf`
